

Miracle Belt™

Sensory Processing made Simple!

Increased Body Awareness • Calming Benefits • Increased Focus & Concentration • Improved Balance & Coordination

Beneficial at Home, School, & Therapy

The **Miracle Belt™** is a weighted therapy belt which promotes self-calming, balance, and increased body awareness by enhancing proprioceptive feedback. Within minutes of wearing the Miracle Belt your child will feel more grounded, focused, and secure.

The **Miracle Belt™** is used to stimulate the proprioceptive system through the use of deep pressure to promote attention, focus, organization, and self-calming. Deep pressure stimulates nerve receptors that are positioned in the muscles, joints and ligaments around joints. These receptors sense tension and pass this information to the brain where it is processed. The brain responds by signaling the muscles to contract or relax creating improved awareness through a stronger neuro-muscular connection with the brain.

The **Miracle Belt™** is useful for infants and children with Autism, Attention Deficit Hyperactivity Disorder (ADHD), Angelman syndrome, Apraxia, Aspergers syndrome (AS), Ataxia, Cerebral Palsy, Down syndrome, Dyslexia, Fetal Alcohol syndrome (FAS), Hypotonia, Pervasive Developmental Disorder (PDD-NOS), Prader-Willi syndrome (PWS), Rett syndrome, Sensory Integration Disorder (SID), and Sensory Processing Disorder (SPD).

The **Miracle Belt™** is a pediatric weighted belt providing sensory processing benefits for infants and children weighing less than 75 pounds. The Sensory Belt is a weighted belt providing sensory processing benefits for teens and adults weighing more than 75 pounds. To learn more about the Sensory Belt please visit www.sensorybelt.com.
